Azaleas

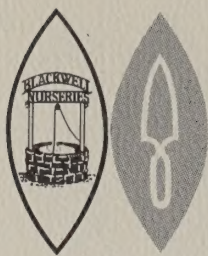

This year we have our usual wonderful lot of Azaleas to offer. They have been sheared many times and are very compact. No one can furnish the high quality Azaleas we ship at a lower price, due to our volume of production. We would appreciate the opportunity to prove this to you.

We are concentrating on producing the highest quality plant, for pot culture, as possible. We grow these plants in German peat moss so you should not experience any trouble in transplanting.

We start shipping about October first, but for growing-on stock — shipments usually go out from April first through June. Place your order as early as possible for best selection of varieties.

Azaleas grown in 3 inch peat pots, 2 months after potting. They will make ideal growing-on stock for November thru January planting if you have a little space in your green-houses.

When we established this nursery in 1938, we decided to specialize in lining out stock. We have done this and are known as the producer of the highest quality liners of anyone in this section. Whether it be Azaleas, Ilex, Magnolias, or any other nursery stock we grow, we produce the best. Repeat orders and more and more new accounts each year are our best testimonials. We are improving our quality and methods of production each season.

This year our lining out stock is the best we have ever grown, and the supply we have will not take care of the demand. We advise early ordering to assure your supply of these fine liners.
